Statement of Profit or Loss and Other Comprehensive Income (3rd Quarter)	12
Statement of Financial Position	13
Statement of Changes in Equity	14
Statement of Cash Flows	15
Notes to the Unaudited Financial Statements	16

The following are the significant accounting policies adopted by the Company in the preparation of its Financial Statements.

1. BASIS OF PREPARATION

These Financial Statements have been prepared in compliance with IAS 34 Interim Financial Reporting and relevant International Financial Reporting Standards (IFRSs), as issued by the International Accounting Standards Board (the IASB).

These Financial Statements were prepared under the historical cost convention. The principal accounting policies applied in the presentation of the Financial Statements are set out below. These policies have been applied to all the periods presented, except for the adoption of new accounting policies.

2. REVENUE

Revenue is measured at fair value of the consideration received or receivable, net of value added tax, excise duties, returns, customer discounts, and other sales related discounts.

Revenue from the sale of products is recognised in profit or loss when the contract has been approved by both parties, rights have been clearly identified, payment terms have been defined, the contract has commercial substance, and collectability has been ascertained as probable. Collectability of customers payment is ascertained from the customers historical records, guarantees provided, and advance payments made, if any.

The five steps recognition process for revenue is listed below:

- identify the contract with a customer
- identify the performance obligation in the contract
- determine the transaction price
- allocate the price to the performance obligation
- recognise revenue.

3. COST OF GOODS SOLD

These are the costs of internally produced goods sold. The cost of internally produced goods includes directly attributable costs such as the costs of direct materials, direct labor, and energy costs, as well as production overheads, including depreciation of production facilities. The costs of goods sold include write-downs of inventories, where necessary.

4. SELLING AND DISTRIBUTION EXPENSES

Comprises the cost of marketing, cost of organising the sales process and distribution.

5. FOREIGN CURRENCY

Items included in the financial statements of the Company are measured using the currency of the primary

economic environment in which they operate ('the functional currency'). The functional currency and presentation currency of the Company is the Nigerian Naira (\aleph).

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from settlement of foreign currency transactions, and from the translation of exchange rates of monetary assets and denominated in currencies other than the Company's functional currency are recognised in the foreign exchange gain or loss in profit or loss.

6. FINANCIAL INSTRUMENTS

Financial instruments represent the Company's financial assets and liabilities. Financial assets and financial liabilities are recognised in the Company's statement of financial position when the Company becomes a party to the contractual provisions of the instrument. These instruments are typically held for liquidity, investment, trading, or hedging purposes. All financial instruments are initially recognised at fair value plus directly attributable transaction cost, except those carried at fair value through profit or loss where transaction cost is recognised immediately in profit or loss.

Financial instruments are recognised (derecognised) on the date the Company commits to purchase (sell) the instruments (trade date accounting).

Financial assets include trade and other receivables, cash and bank balances and certain other assets. Financial liabilities include term loans, bank overdraft, trade, and certain other liabilities. The Company classifies its financial assets into one of the categories discussed below, depending on the purpose for which the asset was acquired. The Company has not classified any of its financial assets as held to maturity.

Subsequent measurement

Subsequent to initial measurement, financial instruments are measured either at fair value or amortised cost, depending on their classifications below. The Company's accounting policy for each category is as follows:

Financial assets

i. Trade and Other Receivables

These assets are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise principally through the provision of goods and services to customers, but also incorporate other types of contractual monetary assets. They are initially recognised at fair value plus transaction costs that are directly attributable to their acquisition or issue, and are subsequently carried at amortised cost using the effective interest rate method, less provision for impairment.

Impairment provisions are recognised when there is objective evidence (such as significant financial difficulties on the part of the counterparty of default or significant delay in payment) that the Company will be unable to collect all of the amounts due under the terms receivable, the amount of such a provision being the difference between the net carrying amount and the present value of the future expected cash flows associated with the impaired receivable.

For trade receivables which are reported net, such provisions are recorded in a separate allowance account with the loss being recognised within administrative expenses in the statement of comprehensive income. On confirmation that the trade receivable will not be collectable, the gross carrying value of the asset is written off against the associated provision.

ii. Cash and Cash Equivalents

Cash and cash equivalents include cash in hand, deposits held at call with banks, other short term highly liquid investments with original maturities of three months or less that are readily convertible to a known amount of cash.

<u>Impairment of financial assets carried at amortized cost.</u>

The Company assesses on each reporting date whether there is objective evidence that trade and other receivables are impaired. Trade and other receivables are impaired if objective evidence indicates that a loss event has occurred after initial recognition, and that loss event has a negative effect on the estimated future cash flows of the receivables that can be estimated reliably. Criteria used by the Company in determining whether there is objective evidence of impairment include:

- known cash flow difficulties experienced by the customer
- a breach of contract, such as default or delinquency in repayment for goods and service
- breach of credit terms or conditions and
- it is becoming probable that the customer will enter bankruptcy or other financial reorganisation.

Financial Liabilities

These include the following items:

i. Bank Borrowings

Bank borrowings are initially recognised at fair value, net of any transaction cost incurred. Borrowings are subsequently carried at amortised costs; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in the profit or loss over the period of the borrowings, using the effective interest method.

General and specific borrowing costs directly attributable to acquisition, construction, or production of qualifying assets, which are assets that necessarily take a substantial period to get ready for their intended use or sale, are added to the cost of those assets, until such a time when the assets are substantially ready for their intended use or sale. All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

ii. Trade Payables and Other Short-term Monetary Liabilities

These are initially recognised at fair value and subsequently carried at amortised cost using the effective interest method.

Fair Value

Fair value is the amount for which an asset could be exchanged, or a liability settled between knowledgeable, willing parties in an arm's-length transaction. The best evidence of the fair value of a financial instrument on initial recognition is the transaction price, i.e., the fair value of the consideration paid or received, unless the fair value is evidenced either by comparison with other observable current market transactions in the same instrument, without modification or repackaging or based on valuation techniques such as discounted cash flow models and option pricing models whose variables include only data from observable markets.

When such valuation models with only observable market data as inputs or the comparison with other observable current market transactions in the same instrument indicate that the fair value differs from the transaction price, the initial difference will be recognised in the profit or loss immediately. The Company does not have any financial instruments (derivatives, etc.) that warrant such valuation method.

Derecognition of Financial Instruments

Financial assets are derecognised when the contractual rights to receive cash flows from the financial assets have expired or where the Company has transferred its contractual rights to receive cash flows on the financial asset, such that it has transferred substantially all the risks and rewards of ownership of the financial asset. Any interest in transferred financial assets that is created or retained by the Company is recognised as a separate asset.

Financial liabilities are derecognised when they are extinguished, i.e., when the obligation is discharged, cancelled, or expires. Where an existing financial liability is replaced by another from the same party on substantially different terms, or the terms of an existing financial liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, with the difference in the respective carrying amounts being recognised in profit or loss.

Offsetting of Financial Assets and Financial Liabilities

Financial assets and liabilities are offset, and the net amount is reported in the statement of financial position when there is a legally enforceable right to offset the recognised amounts, and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right is not contingent on future events and is enforceable in the normal course of business, and in event of default, insolvency or bankruptcy of the Company or counterparty.

7. RETIREMENT BENEFITS

The Company operates two defined benefit schemes for its employees: Defined Contribution Scheme and Defined Benefit Scheme. The defined pension contribution plan is based on a percentage of pensionable earnings funded through contributions from the Company (10%) and employees (8%). The Fund is administered by pension fund administrators. Contributions to this plan are recognised as an expense in the profit or loss in the periods during which services are rendered by employees.

Defined benefit schemes also referred to as employee end of service gratuities are regarded as postemployment benefits.

8. INTANGIBLE ASSETS

Licences

Licences are shown at historical cost. They have a finite useful life and are subsequently carried at cost less accumulated amortisation and impairment losses.

Software

Cost associated with acquiring software programs are capitalised at historical cost. They have a finite useful life and are subsequently carried at cost less accumulated amortisation and impairment losses.

Exploration assets

Exploration assets are carried at cost less accumulated amortisation and impairment losses. The accumulated capitalised costs from exploration assets are amortised using straight-line method.

The Company also amortises other intangible assets with a limited useful life using the straight-line method over the following periods:

	<u>Useful life (years)</u>
Exploration asset	7-40
Licences	2-5
Software	3

9. CURRENT TAXATION

The tax for the period comprises current, education and deferred taxes. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is recognised in other comprehensive income or directly in equity, respectively.

10. DEFERRED TAXATION

Deferred tax is recognised where the carrying amount of an asset or liability in the statement of financial position differs from its tax base. Recognition of deferred tax is restricted to those instances where it is probable that taxable profit will be available against which the difference can be utilised. The amount of the asset or liability is determined using tax rates that have been enacted or substantively enacted by the reporting date and are expected to apply when the deferred tax liabilities / (assets) are settled / (recovered).

11. DIVIDENDS

Dividends are recognised when they become legally payable. Dividend distribution to the Company's shareholders is recognised as a liability in the Company's financial statements in the period in which the dividend is approved by the Company's shareholders at the AGM or when paid.

12. PROPERTY, PLANT AND EQUIPMENT

All property, plant and equipment are stated at historical cost, less depreciation and any accumulated impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the assets carrying amount or recognised as a separate asset, as appropriate only when it is probable that future economic benefits associated with the item to the Company and the cost can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance costs are charged to the profit or loss during the financial period in which they are incurred.

Capital work in progress is not depreciated. Depreciation of assets commences when assets are available for use. Depreciation on other assets is calculated using straight-line method over their expected useful economic life as follows:

	<u>Useful life (years)</u>
Land	Not depreciable
Quarry Equipment	6 - 25
Buildings	30 - 50
Plant and Machinery	3 - 40
Furniture and Fittings	5
Tools and Laboratory Equipment	5
Trucks	4
Computer and Office Equipment	5
Motor Vehicles	4
Construction Work in Progress	Not depreciable

These assets residual values and useful lives are reviewed and adjusted if appropriate at the end of the reporting year.

Property, plant, and equipment are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of the estimated selling price in the ordinary course of business less cost to sell and value in use. Impairment losses and reversal of previously recognised impairment losses are recognised within administrative expenses in profit or loss.

An item of property, plant and equipment is derecognised upon disposal or when no further future economic benefit is expected from its use or disposal. Gains or losses on disposal are determined by comparing the proceeds with the carrying amount and are recognised within other income or other expenses (net in profit or loss).

Quarry exploration and evaluation expenditures are accounted for using the successful efforts method of accounting. Costs are accumulated on a quarry-by-quarry basis. Geological and geophysical costs are expensed as incurred. Costs directly associated with quarry and exploration are capitalised until the determination of minable reserves is evaluated. If it is determined that commercial discovery has been achieved, these costs are charged as expenses.

Capitalisation is made with property, plants and equipment or intangible assets according to the nature of the expenditure. Once commercial reserves are found, exploration and evaluation assets are tested for impairment and transferred to development tangible or intangible assets. No depreciation and/or amortisation is charged during the exploration and evaluation period.

13. INVENTORIES

Inventories are stated at the lower of cost and net realisable value after providing for any obsolescence and damage determined by the Management. Costs are those expenses incurred in bringing each product to its present location and condition which are computed as follows:

- Raw materials, spare parts, and consumables: Actual costs include transportation, handling charges and other related costs
- Work in progress and finished goods: Cost of direct materials, direct labor and other direct cost-plus attributable overheads based on standard costing
- Finished Goods: Direct cost, plus all production overheads.

Inventories are initially recognised at cost, and subsequently at the lower of cost and net realisable value. Cost comprises all costs of purchase, costs of conversion and other costs incurred in bringing inventories to their present location and condition. Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated cost to sell.

Allowance is made for excessive, obsolete, and slow-moving items. Write-downs to net realisable value and inventory losses are expensed in the period in which the write-downs or losses occur.

14. RELATED PARTY DISCLOSURES

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions. Related parties include:

- Entities over which the Company exercises significant influence
- Shareholders and key management personnel of the Company
- Close family members of key management personnel
- Post-employment benefit plan which is for the benefit of employees of the Company or of any entity that is a related party of the Company.

Key management personnel comprise the Board of Directors and key members of the Management having authority and responsibility for planning, directing, and controlling the activities of the Company.

The Company enters into transactions with related parties on an arm's length basis. Prices for transactions with related parties are determined using the current market price or admissible valuation method.

15. BASIC EARNINGS PER SHARE

Basic earnings per share is calculated by dividing the net profit for the year attributable to equity holders of the Company by the weighted average number of ordinary shares outstanding at the statement of financial position date.

16. PROVISIONS

Provisions are recognised when the Company has a present legal or constructive obligation as a result of a past event, and it is probable that the Company will be required to settle that obligation, and the amount has been reliably estimated.

Provisions for restructuring costs are recognised when the Company has a detailed formal plan for the restructuring that has been communicated to affected parties. Provisions are not recognised for future operating losses.

17. BORROWING COSTS CAPITALISED

Borrowing costs that relate to qualifying assets, i.e., assets that necessarily take a substantial period to get ready for their intended use or sale and which are not measured at fair value, are capitalised. All other borrowing costs are recognised in profit or loss.

18. RIGHT-OF-USE ASSET

Right-of-use assets are initially measured at cost comprising of the following:

- the amount of the initial measurement of lease liability
- any lease payments made at or before the commencement date, less any lease incentives received
- any initial direct costs, and
- restoration costs.

The Right-of-use and lease liability are presented separately from other non-lease assets and liability in the statement of financial position.

19. LEASES

The Company primarily leases buildings used as offices and warehouses. The lease terms are typically for fixed periods ranging from 1 to 2 years but may have extension options as described below. On renewal of the lease, the terms may be renegotiated.

Contracts may contain both lease and non-lease components. The Company has elected not to separate lease and non-lease components and instead accounts them as a single lease component. Lease terms are negotiated on an individual basis and contain different terms and conditions including extension and

termination options. The lease agreement does not impose any covenants; however, leased assets may not be used as security for borrowing purposes.

20. SEGMENT REPORTING

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The latter, who is responsible for allocating resources and assessing performance of the operating segments has been identified as BUA Cement Leadership Team, which comprises of the Board of Directors and other Executive Officers.

21. GOVERNMENT GRANT

Grants from the government are recognised at their fair value, where there is a reasonable assurance that the grant will be received, and the Company will comply with all attached conditions. Government grants relating to costs are deferred and recognised in profit or loss over the period necessary to match the with the cost that they are intended to compensate.

22. COMPARATIVE FIGURES

Where necessary, comparative figures with notes have been restated to conform to changes in presentation in the current year.

23. SECURITIES TRADING POLICY

In compliance with Rule 17.15 Disclosure of Dealings in Issuers' Shares, Rulebook of the Exchange 2015 (Issuers' Rules), BUA Cement maintains a Security Trading Policy which guides Directors, Audit Committee members, employees, and all individuals categorised as insiders as to their dealing in the Company's securities. The policy is periodically reviewed by the Board and updated. The Company has made specific inquiries from all its directors and other insiders and is not aware of any infringement of the policy during the period under review.

		148,311,505,685	85,805,780,000

There is no write-down of inventories recognised as an expense during the period. None of the inventories of the Company were pledged as security for loans as at the reporting date.

13a. TRADE AND OTHER RECEIVABLES

Trade receivables Less: loss allowance

159,690,198	63,615,000
(70,000)	(70,000)
159,760,198	63,685,000

All amounts are short-term. The net carrying value of trade receivables is considered a reasonable approximation of fair value.

The Company strictly deals on cash and carry basis, with the exception of three corporate clients in the construction industry who have a corporate guaranteed bond in place, with spelt out pre-agreed credit terms. Trade receivables are not interest bearing.

The average credit period of the Company's sales is 30 days. The Company has financial risk management policies in place to ensure that all receivables are received within the pre-agreed credit terms.

13b. Prepayment and Other Assets

Other prepayments (*)
Prepayment for engineering and construction work
Advance to staff

-	522,951,000

The Company operates a defined contribution pension scheme in line with the provisions of the Pension Reform Act 2004, with contributions based on the sum of employees' basic salary, housing and transport allowance in the ratio of 8% by the employee and 10% by the employer.

The Company's contributions to this scheme is charged to the profit and loss account in the period to which they relate. Contributions to the scheme are managed by appointed pension managers on behalf of the beneficiary staff in line with the provisions of the Pension Reform Act. Consequently, the Company has no legal or constructive obligations to pay further contributions, if the funds do not hold sufficient assets to meet the related obligations to employees.

The Company also has a retirement benefits policy (unfunded) for all its full-time employees who have served the Company for a minimum of 5 years and above. The Company has a post-retirement programme for any employee who has attained the terminal age limit of 60 years.

The above tables summarise the movement in the retirement benefit as recognised in the income statement and the funded status and amounts recognised in the statement of financial position.
